Programme information and content

The programme aims to provide you with a comprehensive degree-level education in Ethics, Value, and Philosophy, to confront your deepest beliefs and assumptions in a characteristically philosophical way, to inform you about current debates in philosophy, and to develop a sense of the significance of philosophical thinking in dealing with modern issues—in particular, issues in value theory. The programme will enhance your global engagement and multi-cultural awareness, teach you the basic rudiments of philosophical argument and different conceptions of social and civic responsibility. It will inform you about current debates in philosophy, develop your sense of the significance of philosophical thinking in dealing with modern problems, and help you appreciate multiple perspectives and the values of diversity. You will cultivate your skills in oral and written argument and be encouraged to compare and contrast very different ways of doing philosophy. The programme of study is specifically designed to introduce you to progressive intellectual challenges and to consolidate your previous experience at each new level.

Part 1:	Part 1 introduces you to the core topics of philosophy and to the basic concepts and methods of critical thinking, basic logic, and the psychology of reasoning. There is a particular emphasis on developing oral and written skills through small group discussion. You will undertake research to produce coursework essays and to learn how to critically appraise what you discover.
Part 2:	Part 2 provides you with a deeper awareness of current philosophers, of the skills of argument and presentation, and of the epistemology and methodology of Philosophy. There is a greater emphasis on developing

	skills of research and enquiry and to presenting arguments in public meetings in an effective way, anticipating and responding to questions, and using a range of means (speaking, summary-writing, essay-writing, presenting, designing slides).
Placement/Study abroad year:	<p>If you are enrolled on a four-year programme, you will undertake a professional placement or study abroad year between Parts 2 and 3.</p> <p>If you choose to study abroad, you will follow several courses at one of our partner institutions. You may take courses that deepen your understanding of subjects you have already studied or extend your knowledge into new areas that are relevant to your personal or career goals.</p> <p>If you choose a professional placement year, you will undertake an approved role related to your programme of study. A placement will provide you with the opportunity to apply the knowledge gained in your first two years of study, as well as develop your skills in a professional context.</p>
Part 3:	Part 3 gives you the opportunity to develop full mastery of the discipline of Philosophy across a broad range of different conceptions of what counts as 'Philosophy'. The emphasis is on developing independent learning, personal effectiveness and self-awareness as well as the ability to reflect effectively on your progress and strengths and on the goals you wish to achieve.
